PREMIUM QUALITY TRACK PAD SOLUTION FOR ROAD PAVING MACHINES

THE NEW SMART PAD

Astrak strive to be at the forefront of product development across all of their product range and are proud to announce their new " Smart Pad " for tracked road paving equipment.

Astrak's Duraline XD Smart Pad is an innovative replaceable rubber pad system that negates the need to dispose of the whole track shoe once its reached the end of it's service life

Constantly replacing the whole shoe and pad combination is both costly and environmentally unfriendly.

DuraLine[®]
XD

Once the Smart Pad has reached its renewal point simply swap out the old pad for a new replacement, keeping the robust and original long-life baseplate in place.

The Smart Pads blend of natural and synthetic rubber (NR/BR/SBR) is identical to that used in the Duraline and Duraline Plus range of rubber pads.

No.	Part Type	Part Code
1	Replaceable Smart Pad	PP300-155-B1
2	Longlife Baseplate	TS155-085-30DG
3	Fixing Hardware*	BL012-025-1.75

*Fixing Hardware Included

Duraline®

SMART PAD TECHNOLOGY **XD**

Astrak's Duraline and Duraline Plus are favoured by many of the largest tracked machinery OEM'S and have been thoroughly field tested on urban roads, country lanes, motorways, and railways around the world.

The Duraline XD range builds on this already impressive pedigree, bringing the latest smart pad technology to the paver marketplace.

Conventional bonded pads require complete replacement. Investing in the Duraline XD Smart Pad means, increased wear life, reduced wastage, reduced labour and overall cost reduction across the replacement cycle.

Vogele Applications*	
MT3000-2	Super 1800-1 EP
Super 1500	Super 1800-2
