How to identify a CAT syle tip

To determine the size of a J Series style tip with no reference due to wear, measure the back of the tip as below:

A (mm)	B (")	Series
51	2.0	J200
57	2.25	J225
64	2.5	J250
76	3.0	J300
89	3.5	J350
102	4.0	J400
114	4.5	J460
140	5.5	J550

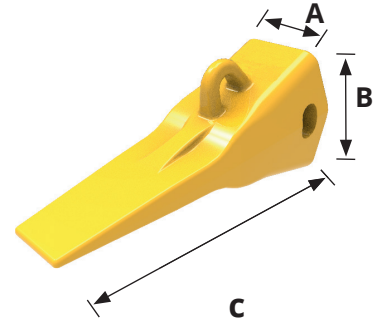

Place a tape measure across the back of the tip at the midpoint of the side walls.

The fourth and fifth digits in the CAT Part Number often refer to the series eg **1U3352 = J350**
